AUTHORITY: §§ 969.0 to 969.12, inclusive, issued under 48 Stat. 31, 670, 675; 49 Stat. 750; 50 Stat. 246; 7 U.S.C. 601 et seq.

§ 969.0 *Findings and determinations*—(a) *Findings upon the basis of the hearing record.* Pursuant to Public Act No. 10, 73d Congress (May 12, 1933), as amended and as reenacted and amended by the Agricultural Marketing Agreement Act of 1937, as amended (hereinafter referred to as the "act"), and the rules of practice and procedure covering the formulation of marketing agreements and orders under the act (7 CFR, 1941 Supp., 900.1-900.17; 7 F.R. 3350; 8 F.R. 2815) a public hearing was held upon a proposed marketing agreement and upon a proposed order regulating the handling of milk in the suburban Chicago, Illinois, marketing area. Upon the basis of the evidence introduced in such hearing and the record thereof, it is hereby found that:

(1) The issuance of this order regulating the handling of milk in the said marketing area, and all of the terms and conditions of this order, will tend to effectuate the declared policy of the act;

(2) The prices calculated to give milk produced for sale in the said marketing area a purchasing power equivalent to the purchasing power of such milk as determined pursuant to sections 2 and 8 (e) of the act are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supplies of and demand for such milk, and the minimum prices specified in this order are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest;

(3) This order regulates the handling of milk in the same manner as and is applicable only to persons in the respective classes of industrial and commercial activity specified in a marketing agreement, upon which a hearing has been held; and

(4) The handling of all milk sold or disposed of in the marketing area, as defined herein, is in the current of interstate commerce, or directly burdens, obstructs, or affects interstate commerce in milk and its products.

(b) *Additional findings*—(1) It is hereby found and proclaimed in connection with the execution of a marketing agreement and the issuance of an order regulating the handling of milk in the said marketing area, that the purchasing power of such milk during the pre-war period August 1909-July 1914 cannot be satisfactorily determined from available statistics of the Department of Agriculture, but that the purchasing power of such milk for the post-war period August 1919-July 1929 can be satisfactorily determined from available statistics of the Department of Agriculture; and the post-war period August 1919-July 1929 is the base period to be used in connection with the said marketing agreement and this order in determining the purchasing power of such milk.

(2) It is hereby found that the necessary expenses of the market administrator for the maintenance and functioning of such agency will amount to approximately \$120,000 per year; and the prorata share of such expense to be paid

by each handler is hereby approved in the maximum amount of 4 cents per hundredweight on all milk received from producers and produced by such handler during each delivery period.

(c) *Determinations.* It is hereby determined that handlers (excluding cooperative associations of producers who are not engaged in processing, distributing, or shipping milk covered by this order), of at least 50 percent of the volume of milk which is marketed within the said marketing area refused or failed to sign the tentatively approved marketing agreement regulating the handling of milk in the said marketing area; and it is hereby further determined that:

(1) The refusal or failure of such handlers to sign such tentatively approved marketing agreement tends to prevent the effectuation of the declared policy of the act;

(2) The issuance of this order is the only practical means pursuant to the declared policy of the act to advance the interests of the producers of milk which is produced for sale in the said marketing area;

(3) The issuance of this order is approved or favored by at least two-thirds of the producers who participated in a referendum on the question of approval of the order and who, during the month of April 1944 (said month having been determined to be a representative period), were engaged in the production of milk for sale in the said marketing area; and

(4) The provision of this order providing for the payment to all producers delivering milk to the same handler of uniform prices for all milk delivered by them is approved or favored by at least three-fourths of the producers who participated in a referendum on the question of approval of such provision and who, during the month of April 1944 (said month having been determined to be a representative period), were engaged in the production of milk for sale in the said marketing area, said approval being separate and apart from the approval of producers as set forth in (3) above.

Order Relative to Handling

§ 969.3 *Reports of handlers—(a) Submission of reports.* Each handler shall report to the market administrator for each delivery period, in the detail and on forms prescribed by the market administrator, the following:

(1) On or before the 7th day after the end of each delivery period, all milk purchased or received from associations of producers and other handlers; and such handler shall submit to the market administrator and to the association of producers, or handlers, from whom the milk was purchased or received, a record of the utilization of such milk classified pursuant to § 969.4.

(2) On or before the 9th day after the end of each delivery period, the quantity, the butterfat test, and butterfat pounds of the receipts at each plant of (i) milk from producers, (ii) milk and cream from other handlers, (iii) milk and cream from sources other than producers and handlers, and (iv) milk produced by him; and shall report the utilization of all receipts of milk and cream.

(4) On or before the 25th day after the end of each delivery period, his producer pay roll, which shall show for each producer (i) the total delivery of milk with the average butterfat test thereof, (ii) the net amount of payment to such producer made pursuant to § 969.8, and (iii) any deductions and charges made by the handler; and such other information with respect to producer payments as the market administrator may request.

(b) *Verification of reports and payments.* The market administrator shall verify all reports and payments of each handler by audit. Each handler shall keep adequate records of the receipts and utilization of milk and shall make available to the market administrator or his representative, during the usual hours of business, all records and facilities as are necessary to enable the market administrator to:

(1) Verify the receipts and disposition of all milk required to be reported pursuant to this section, and, in case of errors or omissions, ascertain the correct figures;

(2) Weigh, sample, and test for butterfat content the milk received from producers and any product of milk upon which classification depends; and

(3) Verify the payments of producers prescribed in § 969.8.

§ 969.4 *Classification of milk—(a) Basis of classification.* All milk, skim milk, and cream received by a handler from producers (including milk produced by him), from associations of producers,

from other handlers, and from all other sources, shall be reported by the handler in the classes set forth in (b) of this section, subject to the following conditions: (1) Milk or skim milk received by a handler from another handler shall be classified as Class I milk, and cream so transferred shall be classified as Class II milk: *Provided*, That if a different classification is agreed upon in written reports to the market administrator, then the milk, skim milk, and cream shall be classified according to such agreement, subject to verification by the market administrator: *Provided further*, That in no event shall the amount so reported in any class be greater than the amount used in that class by the receiving handler; (2) Any milk or skim milk moved from the plant of a handler to the plant of a nonhandler shall be classified as Class I milk and any cream moved to a nonhandler shall be classified as Class II milk, except milk, skim milk, and cream in excess of the amount of fluid milk and fluid cream distributed by such nonhandler; and (3) Milk and cream moved from a plant which has been determined by the market administrator as not receiving milk from producers, to a handler's plant at which milk is received from producers, shall be classified in the lowest class for which such handler has milk.

(b) *Classes of utilization.* Subject to the conditions set forth in (a) of this section, the classes of utilization of milk shall be as follows:

(1) Class I milk shall be all milk disposed of in the form of fluid milk (excluding bulk milk disposed of to bakeries, soup companies, and candy manufacturing establishments, which do not distribute fluid milk), including bulk milk disposed of to hotels, restaurants, and other retail food establishments, and all milk not accounted for as Class II milk, Class III milk, or Class IV milk.

(2) Class II milk shall be all milk, except skim milk, disposed of in the form of flavored milk and flavored milk drinks, and all milk the butterfat from which is disposed of in the form of sweet or sour cream, cottage cheese, and buttermilk.

(3) Class III milk shall be all milk the butterfat from which is used to produce a milk product other than one of those specified in Class II and Class IV, and all bulk milk and bulk cream disposed of to bakeries, soup companies, and candy manufacturing establishments, which do not distribute fluid milk.

(4) Class IV milk shall be all milk the butterfat from which is used to produce butter and cheese, except cottage cheese, and all milk accounted for as actual plant shrinkage not in excess of 2 percent of the total receipts of milk from producers (including the handler's own production). Any handler whose report claimed the original classification of milk in this class shall pay the difference between the Class IV and Class III prices for the delivery period in which the Class IV classification was claimed on any such milk, if the butterfat used in the production of butter is subsequently used in the production of ice cream or ice cream mix.

(c) *Responsibility of handlers in establishing the classification of milk.* In establishing the classification of any milk received by a handler from producers, the burden rests upon the handler who receives the milk from producers to account for the milk and to prove to the market administrator that such milk should not be classified as Class I milk.

(d) *Computation of milk in each class.* For each delivery period, each handler shall compute, on forms prescribed by the market administrator, the amount of milk in each class, as defined in (b) of this section, as follows:

(1) Determine the total of the pounds of milk received from (i) producers (including the handler's own production), (ii) other handlers, and (iii) all other sources;

(2) Determine the total pounds of butterfat received by (i) multiplying the weight of the milk and cream received from each source by its respective average butterfat test, and (ii) adding together the resulting amounts;

(3) Determine the total pounds of milk in Class I by (i) converting to quarts the quantity of milk disposed of in the form of milk, and multiplying by 2.15, (ii) multiplying the result by the average butterfat test, and (iii) if the quantity of butterfat so computed when added to the pounds of butterfat in Class II, Class III, and Class IV milk computed pursuant to (4) (ii), (5) (ii), and (6) (ii) of this paragraph, is less than the total pounds of butterfat received, computed in accordance with (2) of this paragraph, an amount equal to the difference shall be divided by 3.5 percent and added to the quantity of milk determined pursuant to (1) of this subparagraph;

(4) Determine the total pounds of milk in Class II by (i) multiplying the actual weight of each of the several products of Class II milk by its average butterfat test, (ii) adding together the resulting amounts, and (iii) dividing the result obtained in (ii) of this subparagraph by 3.5 percent;

(5) Determine the total pounds of milk in Class III by (i) multiplying the actual weight of each of the several products in Class III milk by its average butterfat test, (ii) adding together the resulting amounts, and (iii) dividing the result obtained in (ii) of this subparagraph by 3.5 percent; and

(6) Determine the total pounds of milk in Class IV by (i) multiplying the actual weight of each of the several products of Class IV milk by its average butterfat test, (ii) adding together the resulting amounts, (iii) subtracting the total pounds of butterfat in Class I milk, Class II milk, and Class III milk, computed pursuant to (3) (ii), (4) (ii), and (5) (ii) of this paragraph, and the total pounds of butterfat computed pursuant to (ii) of this subparagraph, from the total pounds of butterfat computed pursuant to (2) of this paragraph, which resulting quantity shall be allowed as plant shrinkage for the purpose of this paragraph (but in no event shall such plant shrinkage allowance exceed 2 percent of the total receipts of butterfat from producers by the han-

dlers), and adding to the result obtained in (ii) of this subparagraph, and (iv) dividing the result obtained in (ii) of this subparagraph by 3.5 percent.

(7) Determine the classification of milk received from producers by (i) subtracting, subject to the provisions of (a) of this section, from the total pounds of milk in each class the total pounds of milk so used which were received from other handlers who receive milk from producers; and (ii) subtracting, subject to the provisions of (a) of this section, from the total pounds of milk in each class the total pounds of milk and milk equivalent of cream so used which were received from sources other than producers or handlers who receive milk from producers.

(e) *Reconciliation of utilization of milk by classes with receipts of milk from producers.* In the event of a difference between the total quantity of milk utilized in several classes as computed pursuant to (d) of this section and the quantity of milk received from producers, except for excess milk or the milk equivalent of butterfat pursuant to § 969.7 (a) (4), such difference shall be reconciled as follows:

(1) If the total utilization of milk in the various classes for any handler, as computed pursuant to (d) of this section, is less than the receipts of milk from producers, the market administrator shall increase the total pounds of milk in Class IV for such handler by an amount equal to the difference between the receipts of milk from producers and the total utilization of milk by classes for such handler.

(2) If the total utilization of milk in the various classes for any handler, as computed pursuant to (d) of this section, is greater than the receipts of milk from producers, the market administrator shall decrease the total pounds of milk in Class IV for such handler by an amount equal to the difference between the receipts of milk from producers and the total utilization of milk by classes for such handler.

§ 969.5 *Minimum prices.*—(a) *Class prices.* Except as provided by (e) of this section, each handler shall pay to producers and to associations of producers, at the time and in the manner set forth in § 969.8, f. o. b. his plant or distributing station, located in the marketing area, from which milk is disposed of at wholesale or retail, not less than the following prices per hundredweight.

(1) *Class I milk.* (i) The price of Grade A Class I milk shall be the price determined pursuant to (b) of this section, plus 70 cents: *Provided*, That beginning in 1945 the price for such Class I milk for the delivery periods of May and June of each year shall be the price determined pursuant to (b) of this section, plus 50 cents.

(ii) The price of Grade B Class I milk shall be the price determined pursuant to (b) of this section, plus 60 cents: *Provided*, That beginning in 1945 the price for such Class I milk for the delivery periods of May and June of each year shall be the price determined pursuant to (b) of this section plus 40 cents.

(2) *Class II milk.* (i) The price of Grade A Class II milk shall be the price determined pursuant to (b) of this section, plus 32 cents.

(ii) The price of Grade B Class II milk shall be the price determined pursuant to (b) of this section, plus 22 cents.

(3) *Class III milk.* The price for Grade A or Grade B Class III milk shall be the average, computed by the market administrator, of prices reported by the United States Department of Agriculture (or by such other Federal agency as may be authorized to perform this price-reporting function) paid for milk containing 3.5 percent of butterfat delivered during the delivery period by farmers to each of the places or evaporated milk plants, as hereinafter listed and for which prices are reported, but in no event shall such price be less than the price computed pursuant to the formula set forth in (b) of this section.

(4) *Class IV milk.* The price for Grade A or Grade B Class IV milk shall be the price resulting from the following computation by the market administrator: multiply by 3.5 the average price per pound of 92-score butter at wholesale in the Chicago market, as reported by the United States Department of Agriculture (or by such other Federal agency as may be authorized to perform this price-reporting function) for the delivery period during which such milk was received, and add 20 percent: *Provided*, That such price shall be subject to the following adjustments: (1) add 3½ cents per hundredweight for each full one-half cent that the price of nonfat dry milk solids for human consumption is above 5½ cents per pound, or (2) subtract 3½ cents per hundredweight for each full one-half cent that the price of such nonfat dry milk solids is below 5½ cents per pound. For purposes of determining this adjustment the price per pound of nonfat dry milk solids to be used shall be the average of the carlot prices for nonfat dry milk solids for human consumption, f. o. b. manufacturing plant, as published by the United States Department of Agriculture (or by such other Federal agency as may hereafter be authorized to perform this price-reporting function) for the Chicago area during the delivery period,

including in such average the quotations published for any fractional part of the previous delivery period which were not published and available for the price determination of such nonfat dry milk solids for the previous delivery period. In the event prices for nonfat dry milk solids for human consumption, f. o. b. manufacturing plant, are not so published, the average of the carlot prices for nonfat dry milk solids for human consumption, delivered at Chicago, shall be used. In the latter event, the Class IV price shall be subject to the following adjustments: (1) add 3½ cents per hundredweight for each full one-half cent that the price of nonfat dry milk solids for human consumption, delivered at Chicago, is above 7½ cents per pound, or (2) subtract 3½ cents per hundredweight for each full one-half cent that such price of nonfat dry milk solids is below 7½ cents per pound.

(b) *Basic formula price to be used in determining Class I and Class II prices.* The basic formula price to be used in determining the prices per hundredweight of Class I and Class II milk, set forth in this section, shall be the price for Class III milk determined pursuant to (a) (3) of this section, the price for Class IV milk determined pursuant to (a) (4) of this section, or that derived from the following formula, whichever is the highest:

(1) Multiply the average wholesale price per pound of 92-score butter at Chicago for the delivery period as reported by the United States Department of Agriculture (or by such other Federal agency as may be authorized to perform this price-reporting function) by six (6);

(2) Add 2.4 times the average weekly prevailing price per pound of "Twins" during the delivery period on the Wisconsin Cheese Exchange at Plymouth, Wisconsin: *Provided*, That if the price of "Twins" is not quoted on the Wisconsin Cheese Exchange the weekly prevailing price of "Cheddars" shall be used in determining the price pursuant to this formula;

(3) Divide by seven (7); add 30 percent to the resulting amount; and

(4) Multiply the sum computed in (3) of this paragraph by 3.5.

(c) *Butterfat differential to handlers.* If any handler has purchased or received milk from producers containing more or less than 3.5 percent butterfat, such handler shall add or deduct, per hundredweight of milk, for each one-tenth of 1 percent of butterfat above or below 3.5 percent, an amount computed as follows: to the average price per pound of 92-score butter at wholesale in the Chicago market, as reported by the United States Department of Agriculture (or by such other agency as may be authorized to perform this price-reporting function), add 20 percent and divide the result by 10.

(d) *Location adjustments to handlers.* (1) With respect to milk purchased or received from producers at a plant located outside the marketing area and more than 70 miles by rail or highway, whichever is the shorter, from the City Hall in Chicago, Illinois, which is

classified as Class I milk or Class II milk, there shall be deducted 10 cents per hundredweight, plus 2 cents per hundredweight and ¼-cent per hundredweight on each class, respectively, for each additional 15 miles or part thereof that such plant is located in excess of 70 miles from the City Hall in Chicago, Illinois: *Provided*, That no such deduction shall apply to unaccounted-for milk classified as Class I milk pursuant to § 969.4 (d) (3) and such unaccounted-for milk shall be considered to have been received at the most distant plant at which the handler received milk from producers: *Provided further*, That if the l. c. l. freight rate, approved by the Interstate Commerce Commission or by the State authorities having power to fix intrastate rail rates, for the movement of cream in 40-quart cans from the shipping point for the plant where the milk is received from producers to the marketing area is greater than ¼-cent per hundredweight of milk such actual freight rate shall be allowed such handler on Class II milk, but in no case shall such rate exceed ½-cent per hundredweight of milk. There shall be no location adjustment to handlers with respect to Class III milk or Class IV milk.

(2) For the purposes of this paragraph and of § 969.4, (i) Class I milk shall be considered to come first from that milk purchased or received from producers by the handler at his plant located in or nearest to the marketing area from which whole milk is disposed of in the marketing area: *Provided*, That when actual shipments of milk by any handler from two or more plants located in different zones are shown to be in excess of such handler's Class I milk, the location adjustments on Class I milk, as provided in this section, shall be applied to such milk, up to and including 110 percent of such handler's Class I milk; and (ii) Class II milk shall be considered to come first from that milk purchased or received from producers by the handler at his plant located in or nearest to the marketing area, after accounting for Class I milk, from which whole milk or cream is disposed of in the marketing area: *Provided*, That if milk for Class II use was received from producers at a more distant plant, location adjustment shall be allowed from the plant at which such milk was received from producers.

(e) *Adjustment of class prices by War Food Administrator.* Whenever the War Food Administrator finds and announces that the Class I or Class II price determined pursuant to this section is not in accord with the public interest, the applicable price for the delivery period shall be the same as the price for the same class for the delivery period immediately preceding.

(f) *Emergency price provision.* Whenever the provisions hereof require the market administrator to use a specified price (or prices) for milk or any milk product for the purpose of determining class prices or for any other purpose, the market administrator shall add to the specified price the amount of any subsidy, or other similar payment, being made by any Federal agency in connection with the milk, or product, associated

with the price specified: *Provided*, That if for any reason the price specified is not reported or published as indicated, the market administrator shall use the applicable maximum uniform price established by regulations of any Federal agency plus the amount of any such subsidy or other similar payment: *Provided further*, That if the specified price is not reported or published and there is no applicable maximum uniform price, or if the specified price is not reported or published and the War Food Administrator determines that the market price is below the applicable maximum uniform price, the market administrator shall use a price determined by the War Food Administrator to be equivalent to or comparable with the price specified.

§ 969.6 *Application of provisions*—(a) *Handlers who are also producers.* (1) Sections 969.4, 969.5, 969.7, 969.8, 969.9, and 969.10 hereof shall not apply to a handler whose sole sources of supply of milk are receipts from his own production and from other handlers.

(b) *Uniform prices of handler of both Grade A milk and Grade B milk.* If a handler operates both a plant (or plants) from which Grade A milk is disposed of in the marketing area and a plant (or plants) from which Grade B milk is so disposed of, the market administrator shall compute a separate milk value and uniform price for milk disposed of from each type of plant.

(c) *Emergency milk*—(1) Any handler may apply in writing to the market administrator for a determination that the supply of milk or cream available to such handler from sources usual to the marketing area is not sufficient to fulfill such handler's Class I and Class II milk requirements. If such a determination is made by the market administrator such handler, after giving notice to the market administrator of his intention to purchase milk or cream from other sources, may obtain such milk or cream from other plants on terms and conditions other than those provided in §§ 969.5, 969.7, and 969.8 hereof until such time as the market administrator shall revoke his determination; and such milk or cream shall be designated as "emergency milk."

(2) Emergency milk shall be reported to the market administrator by the handler separately from other milk. The person operating the plant from which the handler received such milk shall not be considered to be a handler with respect to milk disposed of in the marketing area under the circumstances described in this paragraph, and the persons who produced such milk shall not be considered to be "producers."

§ 969.7 *Determination of minimum prices to producers*—(a) *Computation of value of milk for each handler.* For each delivery period the market administrator shall compute the value of all milk received by each handler from producers (including such handler's own production and bulk milk received from handlers who are also producers) in the following manner:

(1) Multiply the total quantity of such milk in each class as determined pursu-

ant to § 969.4 by the respective class prices;

(2) Add together the resulting values of each class;

(3) Add or subtract, as the case may be, the amount of the adjustments applicable pursuant to § 969.5 (c) and (d); and

(4) If, after taking account of milk subtracted under § 969.4 (d) (7) (i) and (ii), the handler's records show milk or butterfat in excess of the milk or butterfat which has been credited to his producers as having been delivered by them, add the value of such milk or milk equivalent of such butterfat in accordance with its utilization.

(b) *Computation of uniform prices for each handler.* The market administrator shall compute for each handler the uniform prices per hundredweight of milk received during the delivery period, as follows:

(1) To the value computed pursuant to (a) of this section:

(i) Add the total amount of the location adjustments applicable pursuant to § 969.8 (c);

(ii) Deduct, if the average butterfat content of all milk received from producers is in excess of 3.5 percent, or add, if the average butterfat content of all milk received from producers is less than 3.5 percent, the total value of the butterfat differential applicable pursuant to § 969.8 (b);

(iii) Add an amount representing the fraction used in adjusting the previous month's uniform price to the nearest cent;

(iv) Divide by the hundredweight of milk received from producers; and

(v) Adjust the resulting figure to the nearest cent. This shall be known as the uniform price of the handler for milk of 3.5 percent butterfat content.

§ 969.8 *Payment for milk*—(a) *Time and method of payment.* On or before the 18th day after the end of each delivery period each handler shall pay to each producer, and to each association of producers, for milk purchased or received during the delivery period, an amount of money representing not less than the total value of such milk, at the uniform price per hundredweight computed pursuant to § 969.7 (b), subject to the location adjustments and butterfat differential set forth under (b) and (c) of this section.

(b) *Butterfat differential to producers.* For each one-tenth of 1 percent of average butterfat content above or below 3.5 percent in milk received from any producer or association of producers during the delivery period, the uniform price paid to such producer or association of producers shall be plus or minus, as the case may be, an amount computed as follows: To the average wholesale price per pound of 92-score butter in the Chicago market, as reported by the United States Department of Agriculture (or by such other agency as may be authorized to perform this price-reporting function), add 20 percent, and divide the result by 10.

(c) *Location adjustments to producers.* In making payment pursuant to

(a) of this section, handlers may deduct with respect to all milk purchased or received at a plant located outside the marketing area and more than 70 miles by rail or highway, whichever is the shorter, from the City Hall in Chicago, Illinois, the amount specified as follows:

	Cents per hundredweight
Within 71 to 85 miles.....	12
Within 85.1 to 100 miles.....	14
Within 100.1 to 115 miles.....	16
Within 115.1 to 130 miles.....	18
Within 130.1 to 145 miles.....	20
Within 145.1 to 160 miles.....	22
Within 160.1 to 175 miles.....	24

For each 15 miles or part thereof beyond 175 miles from the City Hall in Chicago, Illinois, an additional ½-cent per hundredweight.

(d) *Correction of errors.* Errors in connection with any of the payments prescribed in this section shall be corrected not later than the next date for making payments, pursuant to this section, following the determination of such errors.

§ 969.9 *Expense of administration.* As his prorata share of the expense of administration hereof such handler, except handlers described under § 969.6 (a) (1), shall pay to the market administrator, on or before the 18th day after the end of each delivery period, an amount not exceeding 4 cents per hundredweight with respect to all milk purchased or received by him during such delivery period from producers (including the handler's own production), the exact sum to be determined by the market administrator, subject to review by the War Food Administrator.

§ 969.10 *Marketing services*—(a) *Marketing service deduction.* In making payments to producers pursuant to § 969.8, each handler, with respect to all milk received from each producer during each delivery period, at a plant not operated by a cooperative association of which such producer is a member, shall, except as set forth in (b) of this section, deduct 3 cents per hundredweight (or such lesser amount as the market administrator shall determine to be sufficient, such determination to be subject to review by the War Food Administrator), and shall, on or before the 18th day after the end of such delivery period, pay such deduction to the market administrator. Such moneys shall be expended by the market administrator for verification of weights, samples, and tests of milk received from such producers and in providing market information to such producers. The market administrator may contract with an association or associations of producers for the furnishing of the whole or any part of such services to, or with respect to, the milk received from such producers.

(b) *Marketing service deductions with respect to members of producers' cooperative associations.* In the case of producers whose milk is received at a plant not operated by a cooperative association of which such producers are members and for whom a cooperative association is actually performing the services set forth in (a) of this section, each handler, in

lieu of the deductions specified in (a) of this section, shall make such deductions from payments made pursuant to § 969.8 as may be authorized by such producers, and pay over, on or before the 18th day after the end of each delivery period, such deductions to the cooperative association rendering such service of which such producers are members.

§ 969.11 *Effective time, suspension, or termination*—(a) *Effective time*. The provisions hereof, or any amendment hereto, shall become effective at such time as the War Food Administrator may declare and shall continue in force until suspended, or terminated, pursuant to (b) of this section.

(b) *Suspension or termination*. Any or all of the provisions hereof, or any amendment hereto, shall be suspended or terminated as to any or all handlers after such reasonable notice as the War Food Administrator may give and, in any event, shall terminate whenever the provisions of the act authorizing it cease to be in effect.

(c) *Continuing power and duty of the market administrator*. (1) If, upon the suspension or termination of any or all provisions hereof there are any obligations arising hereunder the final accrual or ascertainment of which requires further acts by any handler, by the market administrator, or by any other person, the power and duty to perform such further acts shall continue notwithstanding such suspension or termination: *Provided*, That any such acts required to be performed by the market administrator shall, if the War Food Administrator so directs, be performed by such other person, persons, or agency as the War Food Administrator may designate.

(2) The market administrator, or such other person as the War Food Administrator may designate, shall (i) continue in such capacity until removed, (ii) from time to time account for all receipts and disbursements and when so directed by the War Food Administrator deliver all funds on hand, together with the books and records of the market administrator or such person, to such person as the War Food Administrator shall direct, and (iii) if so directed by the War Food Administrator, execute assignments or other instruments necessary or appropriate to vest in such person full title to all funds, property, and claims vested in the market administrator or such person pursuant thereto.

(d) *Liquidation after suspension or termination*. Upon the suspension or termination of any or all provisions hereof the market administrator, or such other person as the War Food Administrator may designate, shall, if so directed by the War Food Administrator, liquidate the business of the market administrator's office and dispose of all funds and property then in his possession or under his control, together with claims for any funds which are unpaid or owing at the time of such suspension or termination. Any funds collected pursuant to the provisions hereof, over and above the amounts necessary to meet outstanding

obligations and the expenses necessarily incurred by the market administrator or such person in liquidating and distributing such funds, shall be distributed to handlers and producers in an equitable manner.

§ 969.12 *Agents*. The War Food Administrator may, by designation in writing, name any officer or employee of the United States to act as his agent or representative in connection with any of the provisions hereof.

Issued at Washington, D. C., this 20th day of July 1944, to be effective on and after the 1st day of September 1944.

It is further ordered, That the respondent shall, within ten (10) days after service upon it of this order, file with the Commission an interim report in writing, stating whether it intends to comply with this order and, if so, the manner and form in which it intends to comply; and that within sixty (60) days after the service upon it of this order, the respondent shall file with the Commission a report in writing setting forth in detail the manner and form in which it has complied with this order.

PART 3290—TEXTILES, CLOTHING AND LEATHER

[Limitation Order L-99, as Amended July 22,
1944]

COTTON TEXTILE PRODUCTION

Section 3290.46 *Limitation Order L-99*, is amended to read as follows:

The fulfillment of requirements for the defense of the United States has created a shortage in the production of cotton textiles and materials for making cotton textiles for defense, for private account and for export; and the following order is deemed necessary and appropriate in the public interest and to promote the national defense:

§ 3290.46 *Limitation Order L-99*—(a) *Operations of spinning machinery and looms producing cotton textiles.* (1) No person shall, regardless of the presentation of rated orders, operate spinning machinery or looms contrary to the provisions in the schedules of this order. These restrictions shall not prohibit, after written notification to the War Production Board, the manufacture of any construction in any group in the schedules of lower pick than the lowest pick

specified in the "May produce only" column as to such group, unless the War Production Board by a specific direction prohibits that manufacture.

In case any person believes it to be in the interest of production for military or essential civilian needs to adjust his production otherwise than as provided in said schedules, he may file an application by letter and the War Production Board will consider such application in the light of programmed requirements.

(2) No person shall operate spinning machinery or looms acquired by him after June 30, 1944 except as specifically authorized in writing by the War Production Board. For such authorization, an application may be made by letter to the War Production Board stating all facts which the applicant deems important and pertinent to his particular case. In all instances he shall state the type of fabric or yarn he wishes to produce, and in instances where he has acquired used spinning machinery or looms he shall state the name of the person who formerly owned or controlled the equipment and the fabric or yarn produced by such former owner.

(b) *Further restrictions.* (1) No producer or converter of cotton textiles shall produce, convert or deliver cotton textiles and no person shall accept delivery of cotton textiles from a producer or converter, contrary to any specific direction which may be issued from time to time by the War Production Board.

(2) General Conservation Order M-317 provides that each producer must make cotton sale yarn, there defined, available for distribution in accordance with the Cotton Yarns, Cordage, and Twine Distribution Schedule annexed to that order. This order (L-99) requires each producer to make in each calendar quarter at least as much sale yarn as he produced in his base period. His base period is the calendar quarter in 1943 in which he delivered to purchasers the largest percentage of his cotton yarn production. Accordingly, each producer must in the calendar quarter beginning April 1, 1944, and in each subsequent calendar quarter, produce at least the same poundage of sale yarn, by Form WPB-658 Schedule E groups, as he produced in those groups in the base period.

(3) Each producer must in the week beginning May 21, 1944, and in each subsequent week, deliver duck yarns of at least the same poundage as he delivered in the week of 1944 in which he delivered the largest quantity of duck yarns.

Producers who have facilities which can produce additional quantities of duck yarns may receive special directions from the War Production Board to deliver specific amounts to designated weavers.

(4) No spinner shall use or dispose of roving except for spinning or on rated orders, unless specifically authorized in writing by the War Production Board. An authorization to use roving for other purposes may be granted if the War Production Board finds that the roving produced by spinners, who do not have spinning spindles, is not needed to fill rated orders, or in cases where spinners show that their spinning spindles are operating at maximum capacity. To secure such authorization, an application must be made by letter to the War Production Board also stating the quantity of roving which the applicant wishes to use or dispose of for other than spinning or the filling of rated orders, and the hours per week which each spinning machine is being operated.

(5) Each person in the business of producing woven cotton textiles shall, in the calendar quarter beginning July 1, 1944 and in each calendar quarter thereafter, produce a minimum linear yardage of each construction on Schedule A marked with an asterisk, equalling the greater of either of the following:

(i) 90% of the linear yardage of such construction produced by him in the second calendar quarter of 1944, or

(ii) The linear yardage which can be produced by operating each loom producing such construction at not less than the number of hours any other loom in his mill is operated.

(6) No person shall operate at a rate under which his aggregate production of

(i) 31" and 63" Army tent twill (U. S. Army Specification JQD-48) and

(ii) 33" and 65" substitute duck (tentative U. S. Army Specification JQD-580), and

(iii) Any other fabrics or widths of fabric which may be developed by negotiation between the producer and the U. S. Army and Navy for use as duck or duck substitute

will be less during any calendar quarter than the aggregate linear yardage of the drills, twills and sateens delivered by him on unrated orders in the period from January 1, 1944 through March 31, 1944.

This requirement shall not prevent the production of any cotton textiles for orders rated AA-2X or higher which were accepted before July 22, 1944.

(7) Each loom which on April 1, 1944, produced or was assigned to the production of bed ticking and which is now required to produce Army tent twill shall be operated at least as many hours per week as the loom which is operated the most hours per week at the same plant.

(8) Each producer of corduroys (reported in Item Numbers 152 through 154, Form WPB-658-B (3/17/44)) shall, beginning September 1, 1944, set aside in each succeeding three months period a poundage of yarns equal to 40% of the poundage of yarn he produced and purchased for weaving into corduroy or jungle cloth in the first calendar quarter of 1944, and shall produce from this set aside yarn one or more of the following fabrics:

(i) Duck.
Army.
Flat, single filling.
Flat, double filling.
Numbered.
Shelter tent.
Flat, high sley, 9.5 oz. (tentative Army Spec. JQD-580), 33" or 65" width, or any width which may be developed by negotiation between the producer and the U. S. Army or Navy.

(ii) Tent twill (U. S. Army Spec. JQD-48), 31" or 63" width, or any width which may be developed by negotiation between the producer and the U. S. Army or Navy.

(iii) Any fabric which may be developed by negotiation between the producer and the U. S. Army or Navy for use as duck or as a duck substitute.

(iv) Jungle cloth for the U. S. Navy.

(c) *Reports and records.* All persons operating spindles or looms for the production of cotton textiles of any kind shall file with the War Production Board, at the time specified in the reporting form, reports on Form WPB-658-A, B, C, D and E, giving the information therein required. All persons affected by this order shall keep and preserve for a period of not less than two years, accurate and complete records concerning inventories, production and sales. The reporting requirements of this order have been approved by the Bureau of the Budget under the Federal Reports Act of 1942.

(d) *Appeals.* Any appeal from the provisions of this order shall be made by filing a letter in triplicate, referring to the particular provisions appealed from and stating fully the grounds of the appeal.

Any appeal from the provisions of paragraphs (b) (6), (b) (7), (b) (8) or Schedule B must contain the following information:

(1) A full statement of the type, model, age and amount of all equipment in the mill, including all pertinent data regarding sizes of rings on spindles owned or operated, and the amount of auxiliary equipment (such as pick gears, reeds, etc. owned).

(2) A full statement of the amount and type of new equipment needed if the provisions of this order are to be met.

(3) A full statement on the amount of labor available in each activity of the mill, and the shifting of this labor which would be necessary and the amount of new labor necessary in order to carry out the provisions of this order.

(4) A full statement of the production of yarns during the preceding three months showing the production of yarns by counts and types of twist.

An appeal for suspension of the requirements of paragraphs (a) or (b) may be made on the ground that compliance will result in production at a loss, provided that an application for price relief on that ground is first filed with the Secretary of the Office of Price Administration, Washington, D. C., and a copy is filed with the WPB appeal. If the WPB appeal is granted, the requirement of these paragraphs for increases above current production will be suspended until the decision by the Office of Price Administration upon the application for price relief. This paragraph does not indicate or limit the extent or kind of price relief, if any, which may be granted by the Office of Price Administration.

(e) *Applicability of regulations.* This order and all transactions affected thereby are subject to all applicable regulations of the War Production Board, as amended from time to time.

(f) *Violations.* Any person who willfully violated any provision of this order, wilfully conceals a material fact or furnishes false information to any department or agency of the United States, is guilty of a crime and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using material under priority control and may be deprived of priorities assistance.

(g) *Communications to the War Production Board.* All reports required to be filed hereunder, and all communications concerning this order, shall, unless otherwise directed, be addressed to: War Production Board, Textile, Clothing and Leather Bureau, Washington 25, D. C., Ref., L-99.

Issued this 22d day of July 1944.

SCHEDULE B

Looms which on July 1, 1944, produced or were assigned to produce the cotton textiles listed in the column captioned "Did Produce" may, after September 1, 1944, to the extent of the percentages indicated, produce only cotton textiles of the construction specified in column captioned "May Produce Only".

The percentages are applicable to the daily average number of looms on assignment or production. Where widths and weights are

mentioned, pro-rata widths of like counts and weights may be produced. The provisions of this schedule shall not apply to persons who do not own or operate spinning equipment which produces cotton yarns. All authorizations issued before July 22, 1944, on appeal from Limitation Order L-99 or Supplementary Limitation Order L-99-a to produce constructions other than those listed in the "May Produce Only" column of this schedule, are revoked.

SCHEDULE C

Roving, ring, mule or converted twister spindles which on July 22, 1944 produced or were assigned to produce the yarn and twine listed in the column captioned "Did Produce" may produce only yarn and twine of the descriptions and counts specified in the column captioned "May Produce Only". This, however, shall not prevent the production to fill specific orders on hand rated

AA-2X or higher. However, after those AA-2X or higher orders have been filled, the spinning machinery must produce the yarn or twine specified for it in the "May Produce Only" column.

All authorizations relating to the subject matter of this schedule issued before July 22, 1944, on appeal from Limitation Order L-99 or from Supplementary Limitation Order L-99-a are revoked.

The bill of lading must contain a description of the rationed foods exported, showing the amount of each, and a statement dated and signed by the master of the vessel on which the foods were consigned or shipped, acknowledging receipt of the foods described and stating that they are destined for export.

2. Section 7 (b) is amended to read as follows:

(b) If exported rationed foods were consigned to an agency of the United States, the exporter may submit a bill of lading, manifest, or other satisfactory evidence that the rationed foods were actually exported to such agency of the United States.

PART 1394—RATIONING OF FUEL AND FUEL PRODUCTS

[Rev. RO 11, Amdt. 17]

FUEL OIL

A rationale for this amendment has been issued simultaneously herewith and has been filed with the Division of the Federal Register.*

Revised Ration Order 11 is amended in the following respects:

1. Sections 1394.5001 (a) (1) and 1394.5001 (a) (7) are revoked.

2. Section 1394.5001 (a) (19a) is added as follows:

(19a) "New facility" means any fuel oil burning equipment acquired or installed after July 31, 1942. The term includes any facility altered or equipped after July 31, 1942 to use fuel oil. The term does not include any of the following:

- (i) Space heaters;
- (ii) Reinstalled facilities;
- (iii) Internal combustion engines, equipment designed and used for domestic cooking or lighting or equipment designed and used for raising and preparing for market crops, other agricultural products, poultry, or livestock; or
- (iv) Parts replacing worn-out parts, or equipment replacing fuel oil burning equipment (other than a new facility or a reinstalled facility) for the purpose of increasing efficiency.

(v) Equipment (other than a new facility) reinstalled in the building from which it had been removed or disconnected because of the relocation of that building.

3. Section 1394.5001 (a) (25a) is added to read as follows:

(25a) "Reinstalled facility" means any equipment which was changed over after July 31, 1942, from the use of fuel oil to the use of an alternate fuel and at any time thereafter altered to the use of fuel oil. The term also includes any fuel oil burning equipment used for furnishing heat or hot water, or both, to premises other than a private dwelling, if by September 24, 1943, substantial work had been done on the equipment to change it over to the use of an alternate fuel. The term does not include any of the following:

- (i) Space heaters; or

(ii) Internal combustion engines, equipment designed and used for domestic cooking or lighting or equipment designed and used for raising and preparing for market crops, other agricultural products, poultry, or livestock.

4. Section 1394.5001 (a) (27) is amended to read as follows:

(27) "Standby facility" means equipment (other than fireplaces) designed to use an alternate fuel and in serviceable operating condition (or which can be placed in serviceable operating condition at reasonable expense), which is available as a substitute for fuel oil burning equipment.

5. Sections 1394.5151 and 1394.5152 are revoked.

6. Sections 1394.5153, 1394.5154, 1394.5155, 1394.5156, 1394.5157, 1394.5158, and 1394.5159 are added as follows:

SPACE HEATERS AND COOKING EQUIPMENT

§ 1394.5153 *Restrictions on issuance of rations for use in space heaters or domestic cooking equipment*—(a) *General*. No ration shall be issued or used for the operation of a space heater furnishing heat or hot water or for the operation of domestic cooking equipment if there is a standby facility or if the space heater was acquired after August 23, 1943. If the standby facility is not in serviceable operating condition but can be placed in such condition at reasonable expense, an interim ration for the operation of the space heater or cooking equipment may be issued for the period ending on the earliest date when the standby facility can be placed in serviceable operating condition, but not in excess of the maximum ration allowable for such period under the applicable provisions of this order.

(b) *Exceptions*. The restriction in paragraph (a) shall not apply if any of the following conditions is present:

(1) *Standby facility; unavailability of alternate fuel*. The District Director, upon finding that an adequate supply of fuel oil is available in the area, has designated the area in which the applicant's standby facility would be used as one in which a sufficient supply of the alternate fuel required for its operation is not available and the Board finds that the standby facility cannot be used because the alternate fuel is not available to the applicant. In such case, an interim ration may be issued in such amount and for such period as the Board determines the applicant requires to meet his minimum needs until a sufficient supply of the alternate fuel is available but not in excess of the maximum ration allowable for such period under the applicable provisions of this order.

(2) *Standby facility; exceptional and unreasonable hardship*. The Board finds that the denial of a ration because of the standby facility restriction would work an exceptional and unreasonable hardship upon the applicant. (The unavailability of an alternate fuel may not be considered under this subparagraph.) In such case, an interim ration may be issued in such amount and for such period as the Board determines the hard-

ship will continue, but not in excess of the maximum ration allowable for such period under the applicable provisions of this order.

(3) *Standby facility operated at capacity.* The standby facility is operated in such manner as to take the place of the fuel oil burning equipment to the maximum extent and to effect the maximum saving of fuel oil. In such case, the allowable ration shall be reduced by the amount that can be saved by the maximum use of the standby facility.

(4) *Space heaters acquired after August 23, 1943.* Even though the space heater was acquired after August 23, 1943:

(i) The space heater was acquired by the applicant pursuant to Ration Order 9A; or

(ii) The space heater was not new when the applicant acquired it but he would have been eligible (but for that space heater), at the time of application for the ration, for a new space heater under Ration Order 9A; or

(iii) The space heater is to heat the same space heated by it before the applicant acquired it.

(5) *Previous exceptions granted by PAW.* The Petroleum Administration for War has, on an application filed prior to July 1, 1944, granted the applicant a currently valid exception, under Petroleum Distribution Order No. 13, as amended, with respect to the facility.

(c) *Rations for domestic cooking equipment between May 15, 1944 and September 30, 1944.* On or after May 15, 1944, a ration may be issued and used for the operation of fuel oil burning equipment designed for domestic cooking even though there is a standby facility. In that event, the allowable ration for domestic cooking shall be the amount of fuel oil needed (within the maximum provided in paragraph (b) of § 1394.5353), for a period ending not later than September 30, 1944. However, such a ration may be issued only for equipment acquired before June 1, 1944.

CENTRAL HEATING AND SEPARATE WATER HEATING EQUIPMENT

§ 1394.5154 *Restrictions on the issuance of rations for use in central heating equipment or separate water heating equipment—(a) General.* No ration shall be issued or used for the operation of central heating equipment furnishing heat or hot water, or for the operation of separate water heating equipment (for which application is made on OPA Forms R-1100 (Revised) or R-1101 (Revised)), if the equipment is a new or reinstalled facility, or if there is a standby facility. If the standby facility is not in serviceable operating condition but can be placed in such condition at reasonable expense, an interim ration for the operation of the fuel oil burning equipment may be issued for the period ending on the earliest date when the standby facility can be placed in serviceable operating condition.

(b) *Exceptions.* The next three (3) sections contain exceptions to the above restrictions.

§ 1394.5155 *When rations may be issued for a new facility.* (a) A ration

may be issued for the operation of a new facility designed to furnish heat or hot water, or both, to any premises only if the Petroleum Administration for War has granted the applicant a currently valid exception under Petroleum Distribution Order No. 13, as amended, with respect to the facility.

§ 1394.5156 *When rations may be issued for a reinstalled facility.* (a) A ration may be issued for the operation of a reinstalled facility furnishing heat or hot water, or both, if any of the following conditions is present:

(1) *Unavailability of alternate fuel.* The District Director, upon finding that an adequate supply of fuel oil is available in the area, has designated the area in which the facility will be used as one in which a sufficient supply of the alternate fuel required for its operation is not available and the Board finds that the alternate fuel is not available to the applicant. In such case, the ration issued (pursuant to the applicable provisions of this order) shall be for the balance of the heating year during which the application is made. Such ration shall not be deemed an interim ration.

(2) *Exceptional and unreasonable hardship—(i) Private dwellings, or rations under 10,000 gallons in other premises.* The premise is a private dwelling, or if not a private dwelling the ration for the entire heating year during which the application is made would be less than 10,000 gallons, and in either case the District Director finds that the denial of the ration would work an exceptional and unreasonable hardship on the applicant. (The unavailability of an alternate fuel may not be considered under this subdivision.) If the District Director grants the application, he shall promptly notify the applicant's Board which shall issue the ration (pursuant to the applicable provisions of this order) for the balance of the heating year for which the application is made. Such ration shall not be deemed an interim ration. If the District Director denies the application, he shall promptly notify the applicant of the decision and forward a copy to his Board. The application for the ration must be made to the Board, and shall be referred by it to the District Director only if the Board recommends the granting of the application; otherwise the Board shall deny the application.

(ii) *Rations of 10,000 gallons or more in premises other than private dwellings.* The premise is not a private dwelling and the ration for the entire heating year during which the application is made would be 10,000 gallons or more, and the Petroleum Administration for War has granted a currently valid exception, under Petroleum Distribution Order No. 13, as amended, with respect to the facility.

(3) *Previous exceptions granted by PAW.* In the case of any premises, the Petroleum Administration for War has on an application filed, prior to July 1, 1944, granted a currently valid exception, under Petroleum Distribution Order No. 13, as amended, with respect to the facility.

§ 1394.5157 *When rations for heat or hot water may be issued even though there is a standby facility.* (a) A ration

may be issued for the operation of central heating equipment or separate water heating equipment even though there is a standby facility if any of the following conditions is present:

(1) *Unavailability of alternate fuel.* The District Director, upon finding that an adequate supply of fuel oil is available in the area, has designated the area in which the standby facility would be used as one in which a sufficient supply of the alternate fuel required for its operation is not available and the Board finds that the standby facility cannot be used because the alternate fuel is not available to the applicant. In such case, an interim ration may be issued (pursuant to the applicable provisions of this order) for the period ending on the earliest date when a sufficient supply of the alternate fuel will be available.

(2) *Standby facility operated at capacity.* The standby facility is operated in such manner as to take the place of the fuel oil burning equipment to the maximum extent and to effect the maximum saving of fuel oil. In such case, the amount of fuel oil, used as a basis for figuring the allowable ration, shall be reduced by the amount that can be saved by the maximum use of the standby facility.

(3) *Exceptional and unreasonable hardship—(i) Private dwellings, or rations under 10,000 gallons in other premises.* The premise is a private dwelling, or if not a private dwelling the ration for the entire heating year during which the application is made would be less than 10,000 gallons, and in either case the Board finds that the denial of the ration because of the standby facility restriction would work an exceptional and unreasonable hardship on the applicant. (The unavailability of an alternate fuel may not be considered under this subparagraph.) In such case, an interim ration may be issued (pursuant to the applicable provisions of this order) for such period as the Board determines the hardship will continue.

(ii) *Rations of 10,000 gallons or more in premises other than private dwellings.* The premise is other than a private dwelling and the ration for the entire heating year during which the application is made would be 10,000 gallons or more, and the Petroleum Administration for War has granted the applicant a currently valid exception, under Petroleum Distribution Order No. 13, as amended, with respect to the standby facility. In such case, the ration issued (pursuant to the applicable provisions of this order) shall be for the period specified in the exception granted by the Petroleum Administration for War.

(4) *Previous exceptions by PAW.* In the case of any premises, the Petroleum Administration for War has on an application filed prior to July 1, 1944, granted a currently valid exception, under Petroleum Distribution Order No. 13, as amended, with respect to the standby facility.

(5) *Rations for domestic hot water equipment between May 15, 1944 and September 30, 1944.* On or after May 15, 1944, a ration may be issued and used for the operation of fuel oil burning equip-

ment designed to furnish domestic hot water in a private dwelling even though there is standby central heating equipment, heating stoves or cooking equipment. In that event, the allowable ration determined in accordance with § 1394.5318 (a) shall be for a period ending not later than September 30, 1944.

MISCELLANEOUS USES

§ 1394.5158 *Restrictions on the issuance of rations for use in industrial, commercial or agricultural equipment*—(a) *General*. No ration shall be issued or used for the operation of fuel oil burning commercial, industrial or agricultural equipment (for which application is made on OPA Forms R-1102 or R-1103), if the equipment is a new or reinstalled facility, or if there is a standby facility. If there is a standby facility which is not in serviceable operating condition but can be placed in such condition at reasonable expense, an interim ration for the operation of the fuel oil burning equipment may be issued for the period ending on the earliest date when the standby facility can be placed in serviceable operating condition.

(b) *Exceptions*. The restriction in paragraph (a) shall not apply if the Petroleum Administration for War has granted the applicant a currently valid exception under Petroleum Distribution Order No. 13, as amended, with respect to the specific restriction. In such case, the ration shall be issued (pursuant to the applicable provisions of this order) only during the period specified in the exception granted by the Petroleum Administration for War.

§ 1394.5159 *Restrictions on issuance and use of rations in certain additional cases*. (a) No ration shall be issued or used in any of the following cases:

(1) *Cooling space*. For the operation of fuel oil burning equipment for the purpose of cooling space (other than hospital space) for human or animal occupancy.

(2) *Passenger automobiles*. For the operation of a private passenger automobile, as defined in General Order No. 21 of the Office of Defense Transportation.

(3) *Coal spraying*. For the spraying of coal with fuel oil other than grade No. 5 or No. 6 or Bunker "C" having an A. P. I. (American Petroleum Institute) gravity of 20° or below.

(4) *Weed control*. For weed control purposes on any road, street, highway or railway right-of-way.

(5) *Premises otherwise supplied with heat or hot water*. For furnishing heat or hot water to premises to the extent that such premises are supplied with heat or hot water as a by-product of an industrial process or the production of power.

(6) *Premises served by central heating equipment*. For the operation of any space heater in premises adequately served by central heating equipment, except as otherwise provided in this order.

(7) *Duplicate rations*. For furnishing heat or hot water to any premises served by equipment for the operation of which a currently valid ration (other than an additional ration under §§ 1394.5341 to 1394.5353) for the purpose has been issued. However, a renewed ration may be issued and used even though a currently valid ration has been issued for the purpose if no other renewed ration has been issued for the purpose.

(8) *Buildings not used for living or occupational purposes*. For the operation of fuel oil burning equipment furnishing heat or hot water to a building or structure which is not used for living or occupational purposes. If the equipment serves only a part of the building or structure and that part is not used for living or occupational purposes, no ration shall be issued or used for furnishing heat or hot water by means of that equipment.

(9) *Uninstalled equipment*. For the operation of fuel oil burning equipment unless the installation of the equipment is substantially completed.

(b) *PAW exceptions*. The restrictions contained in paragraph (a) (2), (3) and (4) of this section shall not apply to equipment with respect to which the Petroleum Administration for War has granted a currently valid exception under Petroleum Distribution Order No. 13, as amended. In such case, the ration shall be issued (pursuant to the applicable provisions of this order) only during the period specified in the exception granted by the Petroleum Administration for War.

7. Section 1394.5160 is added as follows:

§ 1394.5160 *District Director approval for standby exceptions*. The District Director may direct that a Board, before issuing a ration because it finds that a standby facility cannot be repaired at reasonable expense or that a denial of a ration because of the standby facility restriction would work an exceptional and unreasonable hardship, shall submit the application to the District Director for approval. Where such a direction has been given, no such ration may be issued unless the District Director has approved the application.

8. Sections 1394.5318 (b) and 1394.5353 (a) (1) are revoked.

This amendment shall become effective on July 29, 1944.

(3) "Maximum price", except where the context otherwise requires, means the maximum price established by Maximum Price Regulation 288: *Provided, however,* That where pennies are not generally used or available in the course of ordinary retail transactions, adjustments to the nearest nickel may be made by the seller on the total of the combined purchase prices of one or more commodities sold at a single sale, or the total of the combined purchase prices of one or more commodities sold in a series of sales but billed at the end of a period; that the prices of all commodities shall be posted according to the "maximum price" as herein defined.

§ 1418.357 *Prohibited practices—(a) General.* Any device to obtain a higher-than-ceiling price without actually raising the dollar and cents price is as much a violation of this Maximum Price Regulation No. 288 as an outright over-ceiling price. This applies to devices making use of commissions, services, transportation arrangements, premiums, special privileges, tying-agreements, trade understandings and the like.

(b) *Adjustable pricing.* A price may not be made adjustable to a maximum price which will be in effect at sometime after delivery of any commodity covered by this regulation has been completed, but the price may be adjustable to the maximum price in effect at the time of delivery.

(b) *Prices to be marked and posted.* On and after the date any commodity becomes subject to the Maximum Price Regulation No. 288, every person offering to sell at retail any such commodity shall mark the maximum price of such commodity in a manner plainly visible to and understandable by the purchasing public. The maximum prices may be marked on the commodities themselves or may be posted at the place in the establishment where the commodities are offered for sale, and may be posted by price lines if the selling price of each commodity is marked thereon. The maximum prices shall be indicated in the form "Ceiling Price \$-----" or "Our Ceiling \$-----"

(c) *Sales slips and receipts.* Every seller at retail of the commodities subject to this Maximum Price Regulation No. 288 who has customarily given purchasers sales slips or receipts shall continue to do so. Upon request from a purchaser, every such seller, regardless of previous custom, shall give the purchaser a receipt showing the date, the name and address of the seller, the commodity sold, and the price received for it.

§ 1418.359 *Enforcement and licensing.* (a) Persons violating any provision of this Maximum Price Regulation No. 288 are subject to the criminal penalties; civil enforcement actions, suits for treble damages, and proceedings for revocation of licenses provided for by the Emergency Price Control Act of 1942, as amended, and Executive Order No. 9250.

(b) Persons who have evidence of any violation of this regulation or of any other regulation or order issued by the Office of Price Administration are urged to communicate with the nearest office of the Office of Price Administration.

PART 1432—RATIONING OF CONSUMERS'
DURABLE GOODS
[RO 9A, Amdt. 10]

STOVES

A Rationale for this amendment has been issued simultaneously herewith and has been filed with the Division of the Federal Register.*

Ration Order 9A is amended as follows:

1. Section 7.8 is amended to read as follows:

SEC. 7.8 *Damaged stoves may be transferred to certain persons without certificates and without application for approval*—(a) *General*. Damaged stoves (and undamaged stoves included in the same lot as the damaged stoves if the lot of stoves is transferred as a unit) may be transferred to, and acquired by, the following persons without the surrender of certificates and without application for approval of the transfer:

(1) A person who has insured the stoves against loss or damage; or

(2) A common or contract carrier in connection with his liability or payment for damage to the stove; or

(3) A person engaged primarily in the business of adjusting losses or salvaging damaged articles who takes possession of such articles on the occurrence of casualties or in direct connection with the adjustment of losses resulting from casualties.

(b) *Reporting acquisition of damaged stoves*. A person who acquires stoves under paragraph (a) of this Section must, within five (5) days after acquiring them, submit a signed report to the OPA District Office serving the area where his principal business office is located (or if he has no business office, the District Office serving the area where he lives), giving the following information:

(1) His name and address;

(2) The name and address of the person from whom the stoves were acquired;

(3) The total number of stoves, by type, acquired;

(4) The date when the stoves were acquired;

(5) The number of stoves damaged; and

(6) That the stoves were acquired without giving up certificates.

If he cannot give the quantity and type of stoves or the number of damaged stoves acquired on his first report, he must describe the approximate number of stoves, by type, and must give the exact information as soon as he can. He must keep a copy of each report required by this paragraph.

(c) *Disposal of stoves acquired under paragraph (a)*—(1) *General*. A person who acquires a stove pursuant to paragraph (a) may sell or transfer the stove (whether or not repaired) in the same manner that a dealer or distributor

may sell or transfer stoves. If the sale or transfer must be made in exchange for a certificate, he must surrender the certificate within thirty (30) days to the OPA District Office where he is required to file his report.

(2) *When damaged stoves may be transferred certificate-free to dealers, distributors or manufacturers without approval; transferees must report*. A person who acquires a stove pursuant to paragraph (a), may also sell or transfer the stove (whether or not repaired), without the surrender of a certificate and without application for approval of the transfer, to a dealer, distributor or manufacturer. If the person to whom the stove is transferred is a dealer or distributor, he must, within five (5) days, file with his Board a report containing the same information required in paragraph (b). If he is a manufacturer, such information shall be included in his monthly report to the War Production Board. He must keep a copy of each report required by this subparagraph (2).

(3) *Transfers of damaged stoves by dealers or distributors who acquired them certificate-free*. When the dealer or distributor (to whom a stove has been sold or transferred under the preceding subparagraph) makes a sale or transfer of the stove (whether or not repaired), requiring the surrender of a certificate to him, he must promptly surrender the certificate to his Board. Until he has done so, he may not use any certificate to acquire that type of stove for inventory.

2. Section 7.9 is amended to read as follows:

SEC. 7.9 *Damaged stoves may be transferred without certificates upon approval of the Board or District Office*—

(a) *Making application*. A person who has a damaged stove may apply for permission to transfer the stove without obtaining a certificate for it. If he is a consumer, dealer or distributor, he must apply to his Board; otherwise, he must apply to the OPA District Office serving the area where his principal business office is located (or if he has no business office to the District Office serving the area where he lives). (Other sections of this Article VII explain when stoves, whether or not damaged, may be transferred certificate-free.) The application must be signed and must state:

(1) The applicant's name and address;

(2) The number and type of stoves damaged;

(3) The cause and nature of the damage;

(4) How and when the stoves were acquired; and

(5) What efforts he has made to repair and sell or otherwise transfer the stoves for certificates and the reasons why he is unable to do so.

(b) *When permission may be granted*. If the Board or District Office finds that reasonable efforts have been made by the applicant to repair and sell or otherwise transfer the damaged stove in ex-

change for a certificate and that the stove cannot be sold or transferred for a certificate, it may grant permission, in writing, to the applicant to sell or transfer that stove without obtaining a certificate.

3. Section 7.9a is added as follows:

SEC. 7.9a *Dealers and distributors may get certificates to replace damaged stoves transferred or to be transferred without certificates*—(a) *Making application*. A dealer or distributor who sells or transfers a damaged stove without obtaining a certificate pursuant to section 7.8 (a), or who has obtained permission to so sell or transfer the stove under section 7.9, may apply to his Board for a certificate for that type of stove. The application must state:

(1) His name and address;

(2) The number and type of stoves transferred or to be transferred by him;

(3) The number and type of certificates, if any, given up by him for those stoves;

(4) How he acquired the stoves, if he did not give up certificates for them;

(5) The name and address of the person to whom the stoves were transferred, if transferred under section 7.8 (a); and

(6) That the stoves were transferred by the applicant without obtaining a certificate pursuant to section 7.8 (a) or 7.9, or will be so transferred pursuant to section 7.9.

(b) *When application may be granted*. If the Board finds that the applicant has sold or transferred damaged stoves without obtaining certificates in accordance with section 7.8 (a) or section 7.9, or has obtained permission to so sell or transfer damaged stoves in accordance with section 7.9, and that the stoves were acquired by the applicant before September 1, 1943 or for certificates (or were transferred in exchange for stoves acquired in that manner), it will issue to the applicant certificates for those stoves. However, if an applicant has received permission to sell or transfer damaged stoves certificate-free and the Board issues to him certificates for the stoves before he has sold or transferred them, he must, if he sells or transfers any such stove for a certificate, promptly surrender that certificate to his Board.

This amendment shall become effective on July 29, 1944.

for War

[PDO 13, as Amended July 25, 1944]

PART 1526—MARKETING FUEL OIL

TRANSFER AND CONVERSION OF FUEL OIL

The fulfillment of the requirements for the defense of the United States has created in certain areas a shortage in the supply of fuel oil for defense, for private account, and for export; and the following order is deemed necessary and appropriate in the public interest to promote the national defense and to provide adequate supplies of fuel oil for military and other essential uses.

§ 1526.3 *Petroleum Distribution Order No. 13, as amended July 25, 1944*—(a) *Definitions.* (1) "Person" means any individual, partnership, corporation, association, government or government agency, or any other organized group or enterprise.

(2) "Fuel oil" means any liquid petroleum product commonly known as fuel oil, including grades Nos. 1, 2, 3, 4, 5, and 6, Bunker "C," Diesel oil, kerosene, range oil, gas oil, or any other liquid petroleum products (except gasoline) used for the same purposes as the above designated grades.

(3) "Alternate fuel" means any fuel other than fuel oil, electricity, natural gas, manufactured gas or mixed natural and manufactured gas.

(4) "Reinstalled facility" means any equipment formerly using fuel oil which has been converted, in Areas One and Two, subsequent to July 31, 1942, and in Area Three, subsequent to July 22, 1943, to the use of an alternate fuel and which is, or is to be, reconverted to the use of fuel oil, but does not include:

(i) Internal combustion engines.

(ii) Equipment designed and used for domestic cooking or illumination, or for raising and preparing for market crops,

*Copies may be obtained from the Office of Price Administration.

other agricultural products, poultry, or livestock.

(iii) Equipment designed to heat the space adjacent to such equipment without the use of pipes or ducts for conveying heat to such space.

(5) "New facility" means any fuel oil burning equipment other than a reinstalled facility acquired or installed in Areas One and Two subsequent to July 31, 1942, and in Area Three subsequent to July 22, 1943, but does not include:

(i) Internal combustion engines.

(ii) Equipment designed and used for domestic cooking or illumination, or for raising and preparing for market crops, other agricultural products, poultry, or livestock.

(iii) Equipment designed to heat the space adjacent to such equipment without the use of pipes or ducts for conveying heat to such space.

(iv) The replacement of worn-out parts or the replacement of fuel oil burning equipment for the purpose of increasing the efficiency thereof.

(6) "Standby facility" means any equipment (other than fireplaces) in serviceable operating condition, or which can be placed in serviceable operating condition, designed to use an alternate fuel, for the operation of which such fuel is available.

(7) "Coal spraying equipment" means any equipment designed to use or using fuel oil or any other petroleum product for the purpose of applying such fuel oil or other petroleum product to coal.

(8) "Passenger automobile" means any motor vehicle, other than a motor-cycle, built primarily for the purpose of transporting passengers and having a rated seating capacity of seven persons or less.

(9) "Transfer" means to sell, give, exchange, lease, lend, deliver, receive, supply or furnish, and includes the acquisition of title by legal process or operation of law, such as, but not limited to, the acquisition of title by will, inheritance, or foreclosure; it also includes the use by any dealer or supplier of fuel oil held by him; but does not include the creation of a security interest or security title involving no change in possession. Delivery to a carrier for shipment, or by carrier in the course of or in completion of shipment, shall not be deemed a transfer to or by such carrier.

(10) "Area One" means the States of Connecticut, Delaware, Florida (east of the Appalachian River), Georgia, Illinois, Indiana, Iowa, Kansas, Kentucky, Maine, Maryland, Massachusetts, Michigan, Minnesota, Missouri, Nebraska, New Hampshire, New Jersey, New York, North Carolina, North Dakota, Ohio, Oklahoma, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Vermont, Virginia, West Virginia, Wisconsin, and the District of Columbia.

(2) No person shall transfer or accept a transfer of fuel oil for use in the operation of new facilities or reinstalled facilities except:

(i) Where, in the case of new construction, the new facilities were specified in the construction contract and the foundation under the main part of the structure in which the new facilities were to be installed was completed, in Areas One and Two, prior to July 31, 1942, or in Area Three prior to July 22, 1943;

(ii) Where, in the case of either new or reinstalled facilities, the person using such facilities cannot use an alternate fuel either because such fuel is unavailable or because technical utilization factors prevent its use;

(iii) Where the Office of Price Administration, under Revised Ration Order 11, issues a ration for fuel oil for use in a reinstalled facility in any case:

(a) In which a person is required under Revised Ration Order 11 to apply for a ration on OPA Form R-1100—Revised.

(b) In which a person is required under Revised Ration Order 11 to apply for a ration on OPA Form R-1101—Revised, and the annual ration is less than 10,000 gallons.

(3) No person shall transfer or accept a transfer of fuel oil for use in the operation of fuel oil burning equipment where standby facilities are available unless such standby facilities are operated to take the place of such equipment to the maximum possible extent and to effect the maximum reduction of fuel oil requirements.

(4) No person shall transfer or accept a transfer of fuel oil for the operation of a passenger automobile.

(5) No person shall transfer or accept a transfer of fuel oil for use in the operation of weed spraying or weed burning equipment for weed control purposes on any road, street, highway, or railway right-of-way.

(c) *Directions as to conversions.* The Petroleum Administrator for War or any designated representative of the Petroleum Administration for War may, from time to time, examine and investigate the fuel oil burning facilities owned or operated by any person for the purpose of determining whether such equipment can be converted to the use of a fuel other than fuel oil. In making such investigation, facts and circumstances which may relate to the particular problem, including the availability of substitute fuel, shall be considered. If it is found that the fuel oil burning facilities of any person may be converted to the use of a fuel other than fuel oil and that a supply of such fuel is available, without any unreasonable expenditure upon the part of the person and without working any exceptional or unreasonable hardship upon such person, then the Petroleum Administrator for War may, after notice sufficient to permit such conversion, for-

bid further transfers of fuel oil for use in such facilities.

(d) *Appeals.* Any person affected by this order who considers that compliance therewith would work an exceptional and unreasonable hardship upon him may file an appeal setting forth the pertinent facts and reasons why he considers himself entitled to relief. All appeals shall be filed in quadruplicate.

(e) *Appeals and correspondence.* All correspondence and all appeals filed under paragraph (d) shall, unless otherwise directed, be addressed to the District Director of Distribution and Marketing, Petroleum Administration for War, at:

(1) 122 East 42nd Street, New York, New York, if the fuel oil is to be delivered or used in the States of Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Delaware, Pennsylvania, Maryland, Virginia, West Virginia, North Carolina, South Carolina, Georgia, or Florida, or the District of Columbia.

(2) 1200 Blum Building, 624 South Michigan Avenue, Chicago, Illinois, if the fuel oil is to be delivered or used in the States of Ohio, Kentucky, Tennessee, Indiana, Michigan, Illinois, Wisconsin, Minnesota, Iowa, Missouri, Oklahoma, Kansas, Nebraska, South Dakota, or North Dakota.

(3) 245 Mellie Esperson Building, Houston, Texas, if the fuel oil is to be delivered or used in the States of Alabama, Mississippi, Louisiana, Arkansas, Texas, or New Mexico.

(4) 320 First National Bank Building, Denver, Colorado, if the fuel oil is to be delivered or used in the States of Montana, Wyoming, Colorado, Utah, or Idaho.

(5) 855 Subway Terminal Building, Los Angeles, California, if the fuel oil is to be delivered or used in the States of Arizona, California, Nevada, Oregon, or Washington, or the Territories of Alaska or Hawaii.

(f) *Violations.* Any person who willfully violates any provision of this order, or who, by any act or omission, falsifies records kept or information furnished in connection with this order is guilty of a crime and upon conviction may be punished by fine or imprisonment.

Any person who willfully violates any provision of this order may be prohibited from delivering or receiving any material under priority control, or such other action may be taken as is deemed appropriate.

(g) *Effective date.* This order shall become effective on the 29th day of July, 1944.

hereby vests in the Alien Property Custodian the interest of Fritz von Philipp in Royal Saxon Company, Inc., more fully described in subparagraph 2 above, to be held, used, administered, liquidated, sold or otherwise dealt with in the interest of and for the benefit of the United States.

Such property and any or all of the proceeds thereof shall be held in an appropriate account or accounts pending further determination of the Alien Property Custodian. This order shall not be deemed to limit the power of the Alien Property Custodian to return such property or the proceeds thereof in whole or in part, nor shall it be deemed to indicate that compensation will not be paid in lieu thereof, if and when it should be determined to take any one or all of such actions.

SECURITIES AND EXCHANGE COMMISSION.

[File No. 70-910]

CONSOLIDATED ELECTRIC AND GAS CO. AND PORTSMOUTH GAS CO.

NOTICE OF FILING AND ORDER FOR HEARING

At a regular session of the Securities and Exchange Commission, held at its office in the City of Philadelphia, Pennsylvania, on the 22nd day of July, A. D. 1944.

Notice is hereby given that declarations or applications (or both) have been filed with this Commission pursuant to the Public Utility Holding Company Act of 1935 by Consolidated Electric and Gas Company ("Consolidated"), a registered holding company, and its subsidiary, Portsmouth Gas Company ("Portsmouth").

All interested persons are referred to said documents which are on file in the office of the Commission, for a statement of the transactions therein proposed, which may be summarized as follows:

Portsmouth proposes to sell to Allied New Hampshire Gas Company ("Allied"), a gas utility company engaged in the manufacture and distribution of gas in the State of New Hampshire, all of its properties and other assets (except certain minor claims) used in the manufacture and distribution of manufactured gas in the City of Portsmouth, New Hampshire, for \$160,000 in cash, subject to adjustment for net current assets at April 30, 1944, and current earnings thereafter to the date of closing. As part of the purchase price, Allied will assume all of the outstanding contracts, obligations and liabilities of Portsmouth at the time of sale, except any indebtedness owing at that time by Portsmouth to Consolidated, and any tax liabilities of Portsmouth.

The applicants (or declarants) state that all of the outstanding securities of Portsmouth are owned by Consolidated and are pledged under the indenture securing the Federated Utilities, Inc. First Lien Collateral Trust Gold Bonds, 5½% Series, due March 1, 1957 ("Federated Bonds"), and that the Trustee under said indenture holds sufficient funds for the satisfaction and discharge of all outstanding Federated Bonds in accordance

with the terms of the plan approved by this Commission under the Public Utility Holding Company Act of 1935 (File No. 70-812) and approved subsequently by order of the United States District Court for the District of Delaware, entered April 11, 1944. The applicants (or declarants) further state that all of the securities of Portsmouth are subject to the second lien of the Collateral Trust Indenture of Consolidated to Continental Illinois National Bank and Trust Company of Chicago, as Trustee, dated August 1, 1932, securing said Collateral Trust Bonds of Consolidated. Consolidated proposes to have the securities of Portsmouth released from the lien of the Federated Bonds and deposited under the lien of the indenture securing the Collateral Trust Bonds of Consolidated.

The proceeds of the sale will be delivered to Consolidated in liquidation of Portsmouth. A 6% demand note of Portsmouth payable to Consolidated in the principal amount of \$17,000 will be cancelled prior to such liquidation, and Consolidated will deposit the sum so received in liquidation under its Collateral Trust Indenture. Consolidated will ultimately surrender to Portsmouth in connection with its liquidation and dissolution all of the outstanding stock of Portsmouth, consisting of 293 shares of 6% cumulative preferred stock (\$100 par value) and 5,000 shares of common stock (no par value), which will thereupon be cancelled.

The funds so delivered to the Trustee under the Collateral Trust Indenture of Consolidated will be used to effect the retirement of Consolidated's Collateral Trust Bonds by purchases thereof in the open market.

The filing states that the authorization of the Public Service Commission of New Hampshire of the acquisition by Allied New Hampshire Gas Company of the utility assets of the Portsmouth Gas Company will be obtained.

It appearing to the Commission that it is appropriate in the public interest and in the interest of investors and consumers that a hearing be held with respect to said matters and that said applications or declarations shall not be granted or permitted to become effective except pursuant to further order of this Commission.

It is ordered, That a hearing on said matters under the applicable provisions of said act and rules of the Commission thereunder be held on August 4, 1944, at 10:00 a. m., e. v. t., at the offices of the Securities and Exchange Commission, 18th and Locust Streets, Philadelphia, Pennsylvania. On such day the hearing room clerk in Room 318 will advise as to the room in which the hearing will be held.

It is further ordered, That the Secretary of the Commission shall serve notice of the aforesaid hearing by mailing copies of this order by registered mail to Consolidated Electric and Gas Company and Portsmouth Gas Company; and that notice of said hearing be given to all persons by publication of this order in the FEDERAL REGISTER. Any persons desiring to be heard or otherwise wishing to par-

participate in these proceedings, shall file with the Secretary of the Commission on or before August 1, 1944 his request or application therefor, as provided by Rule XVII of the rules of practice of the Commission.

It is further ordered, That Henry C. Lank or any other officer or officers of the Commission designated by it for that purpose shall preside at such hearing. The officer so designated is hereby authorized to exercise all powers granted to the Commission under section 18 (c) of the act and to a trial examiner under the Commission's rules of practice.

It is further ordered, That, without limiting the scope of the issues presented by said applications or declarations, particular attention will be directed at the hearing to the following matters and questions:

(1) Whether the consideration to be received for the assets of Portsmouth is reasonable;

(2) Whether the proposed use of the proceeds of the sale of said assets in the acquisition of Consolidated's Collateral Trust Bonds in the open market is in conformity with the applicable provisions of the Act;

(3) Generally, whether in any respect, the proposed transactions are detrimental to the public interest or to the interest of investors or consumers or will tend to circumvent any provisions of the Act or the rules and regulations promulgated thereunder;

(4) Whether, if the proposed transactions are authorized, the imposition of terms and conditions is necessary and appropriate in the public interest or for the protection of investors and consumers and, if so, what terms and conditions should be imposed.

By the Commission.

NOTICE OF FILING AND ORDER FOR HEARING

At a regular session of the Securities and Exchange Commission, held at its office in the City of Philadelphia, Pa., on the 24th day of July, 1944.

Notice is hereby given that an application, or application-declaration, has been filed with this Commission, pursuant to the Public Utility Holding Company Act of 1935, by NY PA NJ Utilities Company, a registered holding company. At present, NY PA NJ Utilities Company is the holder of 341,359 shares of the common stock of its subsidiary, Jersey Central Power & Light Company, and of \$16,050,000 principal amount of the outstanding \$20,000,000 principal amount of

National Public Service Corporation Secured Gold Debentures, 5% Series, due 1978 ("Debentures"). Pledged as security for the \$20,000,000 principal amount of Debentures are the remaining outstanding 712,411 shares of the common stock of Jersey Central Power & Light Company.

Sections 9 (a) and 10 of the act are designated by NY PA NJ Utilities Company as applicable to the acquisition by it of the 712,411 shares of the common stock of Jersey Central Power & Light Company. NY PA NJ Utilities Company states that the Board of Public Utility Commissioners of the State of New Jersey has jurisdiction "over the transfer upon the books of Jersey Central Power & Light Company of the 712,411 shares of common stock of that company to the name of NY PA NJ Utilities Company", and that no Federal commission other than this Commission has jurisdiction over the proposed transaction.

It appearing to the Commission that it is appropriate in the public interest and the interest of investors and consumers that a hearing be held with respect to such matters:

It is ordered, That a hearing on such matters under the applicable provisions of said act and the rules of the Commission thereunder be held on the 11th day of August 1944, at 10:00 a. m., e. w. t., at the offices of the Securities and Exchange Commission, 18th and Locust Streets, Philadelphia 3, Pennsylvania. purpose shall preside at the hearings in such matter. The officer so designated to preside at any such hearing is hereby authorized to exercise all powers granted to the Commission under section 18 (c) of said act and to a trial examiner under the Commission's rules of practice.

It is further ordered, That, without limiting the scope of the issues presented by said filing, particular attention will be directed at such hearing to the following matters and questions:

1. Whether the proposed acquisition by NY PA NJ Utilities Company of the shares of common stock of Jersey Central Power & Light Company will serve the public interest by tending towards the economical and efficient development of an integrated public utility system;

2. Whether the bid to be made, and the consideration to be paid, by NY PA NJ Utilities Company for the shares of common stock of Jersey Central Power & Light Company to be sold at public auction is reasonable and bears a fair relation to the sums invested in and the earning capacity of the assets underlying such shares of common stock;

3. Whether the fees and expenses involved are for necessary services and are reasonable in amount; and

4. Generally, whether the proposed transaction is in all respects in the public interest and in the interest of investors and consumers and consistent with all applicable requirements of the act and the rules thereunder, or, if not, whether and what modifications or terms and conditions should be required or imposed to satisfy the statutory standards.

It is further ordered, That NY PA NJ Utilities Company cause notice of such hearing to be given to all holders of National Public Service Corporation Secured Gold Debentures, 5% Series, due 1978 (insofar as the identity of such Debenture holders is known or available to NY PA NJ Utilities Company), at least ten days prior to the date of such hearing, by (1) causing to be mailed to the last known address of each of said Debenture holders notice of the date of hearing, and (2) publishing notice of such hearing in a newspaper of general circulation in each of the cities of New York, Chicago, Philadelphia and Boston.
